

JavaScript Practice 1.1

Subject: DOM Manipulation

Created By: Pritey Mehta

1. Create a webpage with a button and a paragraph. Use JavaScript to change the text of the paragraph when the button is clicked.
2. Create a webpage with a list of items. Use JavaScript to add or remove items from the list.
3. Create a webpage with multiple buttons and paragraphs. Use JavaScript to change the text of different paragraphs based on which button is clicked.
4. Create a form with input fields and a submit button. Use JavaScript to validate the form data and display error messages if any of the fields are invalid.
5. Create a webpage with multiple images. Use JavaScript to change the source of the images based on user interaction.
